13. Thursday — Poll: Rent Collection Method
14. Friday — Thread: "How to Calculate Rental Yield"
15. Saturday — Product Teaser Tweet + Image
16. Sunday — Engagement Tweet + Quote Tweet Template
17. Posting Schedule Overview

Part 1: X/Twitter Strategy

X is a text-first, conversational platform. Unlike Instagram's visual focus, X rewards sharp writing, hot takes, and threads that deliver value fast. For Dwella's pre-launch, X is where you build authority and start conversations with landlords, real estate investors, and fintech enthusiasts.

Account Setup

Handle Recommendations

PRIORITY	HANDLE	WHY
1st choice	@dwella_ai	Matches Instagram handle — consistent across platforms
2nd choice	@DwellaApp	Clear product branding
3rd choice	@trydwella	Action-oriented, CTA built into handle

Display Name

Dwella — AI Property Management

Display name is searchable on X. Include your key differentiator.

Bio (160 characters)

> AI-powered rental management for Indian landlords & tenants. No WhatsApp chasing. No spreadsheets. Just smart property management. Waitlist open 👇

159 characters

Header Image Specs

Header Banner (1500 × 500 px)

- **Background:** #0F172A (dark)
- **Left side:** Tagline — "India's Smartest Rental Management App" in white, Plus Jakarta Sans Bold
- **Right side:** App mockup screenshot or abstract property illustration
- **Bottom-right:** "Waitlist Open" badge in green
- **Do NOT include:** Handle (already visible), small text, busy patterns

Profile Picture

Use the Dwella logo (same as Instagram). X displays it at 400×400 px. Ensure the logo reads clearly at 48×48 (timeline thumbnail size).

Pinned Tweet

> We're building Dwella — an AI-powered app that makes rental management effortless for Indian landlords and tenants.

✅ Auto rent tracking
✅ AI-powered reminders
✅ Payment proof storage
✅ One-tap rent receipts
✅ Landlord + Tenant on one platform

No more WhatsApp chasing. No more Excel sheets.

Waitlist is open — link in bio.

Follow along as we build in public 🚀

Content Pillars for X

X content needs to be faster, punchier, and more opinionated than Instagram. Here are the 5 pillars adapted for the platform:

PILLAR	WHAT IT IS	X FORMAT	FREQUENCY
Education	Rental yield, HRA, tax tips, property management knowledge	Threads (5–10 tweets), single value tweets	2×/week
Pain Points	Relatable landlord/tenant struggles, "this you?" moments	Single tweets, quote tweets, meme-format text	2×/week
Product	Feature previews, build-in-public updates, waitlist CTAs	Screenshot tweets, short threads, single tweets	1×/week
Engagement	Polls, questions, hot takes that invite replies	Polls, open-ended questions, "unpopular opinion" format	1×/week
Authority	Indian real estate data, market insights, founder perspective	Quote tweets with commentary, data tweets	1×/week

Posting Cadence & Best Times

Optimal Cadence

TYPE	FREQUENCY	NOTES
Original tweets	1–2 per day	At least 1 per day to stay visible in feeds
Threads	2–3 per week	X's highest-engagement format. Treat like IG carousels.
Replies/engagement	10–15 per day	Reply to big accounts, participate in conversations
Quote tweets	2–3 per week	Add your take to trending topics or relevant tweets

Best Posting Times (IST) for Indian Audience

TIME SLOT	WINDOW	WHY
Morning	8:00 – 9:30 AM	Commute scrolling, morning catch-up. Great for single tweets.
Lunch	12:00 – 1:30 PM	Lunch break browsing. Best for threads (people have time to read).
Evening	6:30 – 8:00 PM	Post-work wind-down. Best for engagement tweets and polls.
Late Night	9:30 – 11:00 PM	Late-night scrollers. Good for relatable/funny tweets.

Pro Tip: Post threads between 12:00 – 1:00 PM IST. Indian professionals scroll Twitter during lunch — threads get the most saves and retweets during this window.

Hashtag Strategy

X hashtags work differently from Instagram. Less is more — 1–3 hashtags maximum per tweet. Overusing hashtags looks spammy on X and actually decreases engagement.

Rules

- **Threads:** 0–1 hashtags. Let the content speak. Add one hashtag on the last tweet if any.
- **Single tweets:** 1–2 hashtags maximum. Integrate naturally into the sentence when possible.
- **Polls:** 1 hashtag max, or none.
- **Never:** Stack hashtags at the end like Instagram. Never use more than 3.

Primary Hashtags (Use Regularly)

#PropTech #RealEstateIndia #LandlordLife

Secondary Hashtags (Rotate)

#PropertyManagement #RentalProperty #IndianRealEstate #PassiveIncome #StartupIndia #BuildInPublic #AIStartup

Trending/Event Hashtags (Use When Relevant)

#TaxSeason #ITRFiling #HRA #BudgetIndia #NRIInvesting

Key difference from IG: On Instagram, you use 15–25 hashtags for reach. On X, tweets with 1–2 hashtags get 21% more engagement than those with 3+. Quality over quantity.

Thread Strategy

Threads are X's highest-engagement format — they're the equivalent of Instagram carousels. A well-crafted thread can go viral and drive hundreds of profile visits.

Thread Structure

TWEET #	PURPOSE	WHAT TO WRITE
1 (Hook)	Stop the scroll	Bold claim, surprising stat, or relatable pain point. End with "🧵 Thread" or "A thread 👇"
2–7 (Body)	Deliver value	One idea per tweet. Keep each under 240 chars. Use line breaks for readability.
Last (CTA)	Convert	Soft CTA: "Follow @dwella_ai for more" or "Link in bio for waitlist"

Thread Best Practices

- **Hook is everything.** 80% of your effort should go into tweet #1. If the hook doesn't stop the scroll, nobody reads the rest.
- **One idea per tweet.** Never cram two points into one tweet.
- **Use line breaks.** Dense paragraphs get skipped. White space = readability.
- **Number your points.** "1/", "2/" etc. makes threads scannable.
- **End with value, not just a CTA.** Your last tweet should give something (a summary, a takeaway) before asking for a follow.
- **Self-reply immediately.** Post the entire thread at once (write in drafts, then post). Don't drip-feed over hours.
- **Add an image to tweet #1.** Threads with a hook image get 2× more impressions.

Growth Tactics

Daily Engagement Routine (20 mins/day)

ACTIVITY	TIME	WHAT TO DO
Reply to big accounts	10 mins	Find 5 tweets from accounts with 10K+ followers in real estate, fintech, or startup space. Leave thoughtful, value-adding replies (not "great post!"). Your reply appears under their tweet — free impressions.
Engage with peers	5 mins	Like and RT 3–5 tweets from accounts your size. Build relationships, not just reach.
Respond to your replies	5 mins	Reply to every comment on your tweets within 1 hour. The algorithm rewards active conversations.

Accounts to Follow & Engage With

CATEGORY	TYPES OF ACCOUNTS	WHY
Indian Real Estate	Property consultants, real estate YouTubers, housing news handles	Your target audience follows these. Your replies reach their followers.
Indian Fintech	CRED, Jupiter, Fi, Zerodha — and their founders	Aspirational brand association. Similar audience demographics.
Personal Finance India	CA/tax influencers, investment educators	HRA, rental yield, tax content resonates with this overlap.
Startup/Builder	#BuildInPublic community, indie hackers, startup founders	Community support, retweets, early adopters.

X Spaces Strategy

Hosting a Space (Start in Week 3–4)

- **Topic:** "Landlord Problems in Indian Metros — Let's Talk Solutions"
- **Format:** 30-min casual conversation. Invite 2–3 landlords as co-hosts.
- **Frequency:** Bi-weekly (Saturdays 11 AM IST)
- **Promotion:** Tweet about it 24 hours before + 1 hour before. Pin a tweet with the Space link.

Reply Strategy: How to Write High-Value Replies

The "Add, Don't Agree" Rule: Never just say "so true" or "great thread." Instead, add a data point, a personal experience, a counterpoint, or a follow-up question. High-value replies get likes independently — and people click through to your profile.

Example: If someone tweets about rising rents in Bangalore →

> This is exactly why landlords need systems to track yields.
>
> Most Indian landlords don't know their actual rental yield. They bought a flat, found a tenant, and hope for the best.
>
> We ran the numbers — average yield in Indian metros is 2–3%. That's worse than an FD.
>
> (Building @dwella_ai to fix this)

Brand Voice Guide for X

X voice is **shorter, punchier, and more conversational** than Instagram. Think "smart friend who knows real estate" not "brand marketing team."

DIMENSION	INSTAGRAM	X/TWITTER
Tone	Polished, informative, visual-first	Casual, witty, text-first. Like texting a smart friend.
Length	Long captions (150–300 words)	Short & punchy. Single tweets under 200 chars ideal.
Emojis	Liberal use (bullet points, emphasis)	Minimal. 1–2 per tweet max. Let words do the work.
Hashtags	15–25 per post	1–2 per tweet (or zero)
CTA style	"Link in bio" / "Save this post"	"Follow for more" / "RT if you agree" / "Link in bio"
Personality	Trustworthy expert	Opinionated builder. Slightly edgy, always helpful.

Voice Examples

SCENARIO	INSTAGRAM VERSION	X VERSION
Rent chasing	"Stop managing your rental properties on WhatsApp. There's a better way."	"You're texting 'bhai rent?' for the 4th time this month. There's gotta be a better way. (There is.)"
Product tease	"Dwella handles it all — AI-powered rent tracking, auto-reminders, and payment proof in one app."	"What if your tenants got auto-reminders before rent was due, and you never had to send an awkward text again? Building this."
Education	"Here's exactly what a valid rent receipt needs for HRA exemption (swipe for checklist)"	"Your tenant's HRA claim just got rejected because you forgot your PAN on the rent receipt. Here's the fix (thread):"

Part 2: Week 1 Content Kit

7 days of pre-written, ready-to-post content. Copy, paste, post. Each day includes the tweet/thread text, format type, optimal posting time, and hashtags.

MONDAY

THREAD Why Indian Landlords Are Losing Money Silently

Post at: 12:30 PM IST • **Format:** Thread (8 tweets) • **Image:** Add a hook image to tweet 1 (dark bg + bold text: "5 ways landlords bleed money")

Thread (Copy-Paste Ready)

1 **HOOK**

Most Indian landlords are losing money every single month.

Not because of bad tenants.
Not because of low rent.

Because they have no system.

Here are 5 silent money leaks killing your rental income 📝 👇

2

1. No rent tracking system

You rely on memory or WhatsApp screenshots.

"Usne June mein bheja tha na?"
"Wait, let me scroll up..."

Payments slip through the cracks. You forget. They forget. Money disappears.

3

2. No payment proof on file

Tenant says they paid.
You say they didn't.

No receipts = no proof = arguments every quarter.

This is how landlord-tenant relationships break down.

4

3. Late rent goes unchallenged

You feel awkward chasing.
So you wait.
And wait.

"Kal bhejta hoon bhaiya" turns into 2 weeks of silence.

That's ₹1000s lost every month to avoidable delays.

5

4. Tax season is a nightmare

Your CA asks for 12 months of rent records.

You have:
- 3 UPI screenshots
- A WhatsApp message from August
- Vibes

Missed deductions. Wasted hours. Unnecessary stress.

6

5. No visibility across properties

Own 2–3 flats in different cities?

Each one managed differently:
- One on WhatsApp
- One on Excel
- One on "I'll remember"

Total chaos.

7

The fix isn't complicated.

You need ONE app that:
- Tracks every payment automatically
- Sends rent reminders for you
- Stores payment proof

• Generates receipts in one tap
• Works for landlord AND tenant

We're building exactly this.

8 **CTA**

It's called Dwella — AI-powered rental management built for India.

Waitlist is open.

Follow @dwella_ai for updates.
Link in bio to join.

RT tweet 1 if you know a landlord who needs this 🔄

TUESDAY

SINGLE TWEET

Relatable Landlord Pain Point

Post at: 8:30 AM IST • **Format:** Single tweet • **Goal:** Maximum relatability → likes, RTs, profile visits

Main Tweet (Copy-Paste Ready)

Indian landlord starter pack:

• WhatsApp group named "Flat 3B Rent"
• Last updated Excel sheet: 2023
• "Bhaiya kal bhejta hoon" on repeat since March
• Zero idea what your actual rental yield is
• Tax season = panic mode

This is exactly why we're building @dwella_ai

Follow-Up Tweet (Post 2 hours later)

Genuinely curious —

How do you currently track rent from your tenants?

Reply below. No judgment. We're building something to fix this.

Hashtags

Main tweet: #LandlordLife #RealEstateIndia (integrated or at end)

Engagement tip: Reply to every response on the follow-up tweet. Ask follow-up questions. This signals to the algorithm that your tweets spark conversations, boosting future reach.

WEDNESDAY

THREAD Rent Receipt for HRA — The Complete Checklist

Post at: 12:30 PM IST • **Format:** Thread (7 tweets) • **Image:** Checklist infographic on tweet 1

Thread (Copy-Paste Ready)

1 HOOK

Your tenant's HRA claim just got rejected.

Reason? Your rent receipt was missing 3 fields.

Here's exactly what a valid rent receipt needs in India (save this) 👇

2

A valid rent receipt MUST include:

✅ Landlord's full name
✅ Landlord's PAN (if rent > ₹1,00,000/year)
✅ Complete property address
✅ Rent amount per month
✅ Payment period (from — to dates)
✅ Revenue stamp (for cash payments)
✅ Landlord's signature

Miss any of these? Receipt is invalid.

3

The PAN rule most landlords miss:

If annual rent exceeds ₹1,00,000 — your PAN is MANDATORY on the receipt.

No PAN = tenant's HRA claim gets rejected by their employer.

They'll blame you. And they'd be right.

4

Common mistakes that get receipts rejected:

❌ No PAN when rent > ₹1L/year
❌ Missing property address (just "Pune" isn't enough)
❌ No date range mentioned
❌ Handwritten receipts without revenue stamp
❌ Generic format downloaded from random website

5

What format should you use?

PDF is best. Include:
• Your letterhead or name at top
• All 7 fields from tweet 2
• Month-wise breakup if giving for full year
• Your signature (digital is accepted)

Your CA will thank you.

6

Pro tip for landlords:

Don't wait for your tenant to ask.

Send the receipt proactively in January (for the previous year). It shows professionalism, avoids last-minute panic, and keeps the relationship healthy.

Tenants remember landlords who make their life easy.

7 **CTA**

We're building @dwella_ai to auto-generate compliant rent receipts.

Correct format. Every field filled. Downloadable as PDF. One tap.

No more Googling "rent receipt format India."

Waitlist open — link in bio.

THURSDAY

POLL How Do You Collect Rent?

Post at: 7:00 PM IST • **Format:** Poll (24-hour) • **Goal:** Engagement + audience research

Poll Tweet (Copy-Paste Ready)

> Landlords — how do you currently collect rent from your tenants?
>
> 📊 Poll below 👇

Poll Options

OPTION	TEXT
1	UPI + WhatsApp screenshot
2	Bank transfer + hope they paid
3	Cash (and I forget sometimes)
4	I have a proper system

Follow-Up Tweet (Post after poll ends, 24 hours later)

> Poll results are in.
>
> [X]% of landlords are tracking rent via WhatsApp screenshots or "hope."
>
> This is exactly the problem we're solving at @dwella_ai.
>
> Auto-tracking. Auto-reminders. Payment proof stored permanently.
>
> No more guesswork.
>
> Waitlist is open — link in bio.

Replace [X]% with actual poll result.

Bonus: Engagement Thread After Poll

> Replying to my own poll because the responses are wild.
>
> If you voted "Cash (and I forget sometimes)" — you're literally paying a tax on disorganization.
>
> At ₹15,000/month rent, forgetting ONE month = ₹15,000 gone.
>
> Across 5 years = ₹75,000+ lost.
>
> Still think you don't need a system?

Hashtags

Poll tweet: #LandlordLife (no other hashtags on polls — keep it clean)

FRIDAY

THREAD How to Calculate Rental Yield on Your Property

Post at: 12:30 PM IST • **Format:** Thread (8 tweets) • **Image:** Formula graphic on tweet 3

Thread (Copy-Paste Ready)

1 **HOOK**

Your ₹80 lakh flat in Bangalore is earning you 2.5% rental yield.

An FD gives you 7%.

You're literally losing money by renting it out. Unless you fix this.

Here's how to calculate (and improve) your rental yield 👇

2

What is rental yield?

The annual return you earn from rent, expressed as a % of your property's market value.

It's the single most important number every landlord should know.

Yet most Indian landlords have never calculated it.

3

The Formula:

Gross Rental Yield = (Annual Rent ÷ Property Value) × 100

That's it. Simple math that most property owners never do.

4

Let's run a real example:

Property value: ₹80,00,000

Monthly rent: ₹25,000
Annual rent: ₹3,00,000

Yield = (3,00,000 ÷ 80,00,000) × 100
Yield = **3.75%**

Is that good? Let's check 👇

5

Rental yield benchmarks in India:

🔴 Below 2% — Terrible. Sell or restructure.
🟡 2–3% — Below average. Most Indian metros sit here.
🟢 3–4% — Average. Decent but improvable.
⭐ 4–5% — Good. You're doing better than most.
🚀 5%+ — Excellent. Commercial or premium locations.

6

But wait — that's GROSS yield.

Net yield = (Rent – Expenses) ÷ Property Value × 100

Subtract:
• Maintenance charges
• Property tax
• Insurance
• Vacancy months
• Repair costs

Your net yield is always lower. Often painfully lower.

7

How to actually improve your yield:

1. Price at current market rate (not 2019 rent)
2. Reduce vacancy — respond to enquiries fast
3. Furnish to charge 20–30% premium
4. Track every single payment (don't let money slip)
5. Send timely reminders — reduce late payments

Most of these are just discipline + the right tools.

8 **CTA**

We're building @dwella_ai to help landlords stop losing yield to missed payments and disorganized tracking.

AI-powered. Built for India.

Waitlist is open — link in bio.

If this was useful, RT tweet 1 so other landlords see it too 🔁

Hashtags

Add to tweet 8 only: #RealEstateIndia #RentalYield

SATURDAY

SINGLE TWEET

Product Teaser + App Screenshot

Post at: 10:00 AM IST • **Format:** Single tweet + image • **Image:** App screenshot showing the dashboard or payment ledger (clean, polished)

Main Tweet (Copy-Paste Ready)

Been building this for months and it's finally taking shape.

Dwella — AI-powered rental management for Indian landlords and tenants.

What you're looking at:
• Every property on one screen
• Every payment tracked automatically
• AI that reminds tenants so you don't have to

No WhatsApp groups. No Excel sheets.

Waitlist is open. Ship date coming soon.

Follow @dwella_ai for the journey 🚀

Image Specifications

App Screenshot (1200 × 675 px — X optimal)

- **Option A:** Clean screenshot of Dwella dashboard (properties tab) on a phone mockup
- **Option B:** Payment ledger screenshot showing status badges (green confirmed, gray pending)
- **Background:** ■ #0F172A with subtle gradient
- **Phone frame:** Modern iPhone/Android mockup, centered
- **Bottom text:** "Dwella — AI Property Management" in white, small

Follow-Up Tweet (4 hours later)

The problem with managing rental properties in India isn't the tenants.

It's the tools.

WhatsApp wasn't built for rent tracking.

> Excel wasn't built for auto-reminders.
> Your memory isn't a payment system.
>
> Dwella is built for exactly this. Coming soon.

Hashtags

Main tweet: #BuildInPublic #PropTech

SUNDAY

ENGAGEMENT

Conversation Starter + Quote Tweet Template

Post at: 10:00 AM IST (main) + throughout the day (quote tweets) • **Format:** Engagement tweet + QT template • **Goal:** Community building, replies, profile visits

Main Tweet (Copy-Paste Ready)

> Honest question for landlords in India:
>
> What's the ONE thing about managing your rental property that drives you absolutely crazy?
>
> Don't hold back. Reply below 👇
>
> (Building something to fix all of these. Seriously.)

Engagement Strategy for Replies

IF THEY SAY...	REPLY WITH...
"Chasing tenants for rent"	"This one came up the most. What if reminders went out automatically — 3 days before, on due date, and 3 days after? No awkward texts from you."
"Tracking payments across properties"	"Especially if you have 2-3 flats in different cities. One dashboard to see everything — that's what we're building."
"Tax receipts / HRA"	"We wrote a whole thread about this (pinned on our profile). Dwella will auto-generate compliant receipts in one tap."
"Finding good tenants"	"Verification + better communication goes a long way. We're thinking about this for a future version."
"Maintenance requests"	"Noted. This is on our roadmap. What would your ideal system look like for handling maintenance?"

Quote Tweet Template

Find a tweet from a real estate account, fintech brand, or landlord sharing a pain point. Quote tweet with your angle:

> **[Quote tweet a relevant post about renting/property management]**
>
> This is exactly why we're building @dwella_ai.

Indian landlords deserve better tools than WhatsApp + Excel.

AI-powered rental management. Waitlist open — link in bio.

Afternoon Tweet (3:00 PM IST)

Sunday thought:

The average Indian landlord spends 3–5 hours/month just chasing rent and managing records.

That's 60 hours a year.

On something an app could handle in seconds.

We're building that app. It's called Dwella. Waitlist open.

Hashtags

Main tweet: no hashtags (pure engagement play). Afternoon tweet: #PropTech

Week 1 Posting Schedule (IST)

DAY	CONTENT	FORMAT	POST TIME	GOAL
Monday	5 Money Leaks for Landlords	THREAD	12:30 PM	Educate + establish authority
Tuesday	Landlord Starter Pack	TWEET	8:30 AM	Relatability + virality
Wednesday	Rent Receipt HRA Checklist	THREAD	12:30 PM	High-save, evergreen value
Thursday	Rent Collection Poll	POLL	7:00 PM	Engagement + audience insight
Friday	How to Calculate Rental Yield	THREAD	12:30 PM	Authority + saves
Saturday	Product Teaser + Screenshot	TWEET	10:00 AM	Product awareness + waitlist
Sunday	Engagement + Quote Tweet	ENGAGE	10:00 AM	Community + conversations

Remember: In addition to these scheduled posts, aim for 10–15 replies/day on other accounts' tweets. Engagement compounds — your replies are seen by their followers.

Quick Reference: X vs Instagram Cheat Sheet

ELEMENT	INSTAGRAM	X/TWITTER
Primary format	Reels, Carousels	Threads, Single Tweets
Hashtags	15–25 per post	1–2 per tweet (max 3)
Posting frequency	1 post/day	1–2 tweets/day + 10–15 replies
Best engagement driver	Reels (algorithm push)	Threads + replies (conversation-based)
CTA	"Link in bio" / "Save"	"Follow" / "RT" / "Reply"
Tone	Polished, visual	Casual, punchy, opinionated
Growth lever	Explore page + Reels	Replies on big accounts + viral threads
Content lifespan	24–48 hrs (then archive value)	4–8 hrs (unless it goes viral)
